

**We make your people
better problem solvers**

FAILURE ANALYSIS TRAINING CLASSES

REPEAT FAILURES GOT YOU DOWN?

We understand what the loss of mechanical availability, and lost production costs can total. Whether we're talking about a RECIPROCATING GAS COMPRESSOR, a MARINE PROPULSION ENGINE, a 350T MINING TRUCK, or your customers DOWNED EXCAVATOR (that should be loading trucks all week). Unplanned downtime and excessive callouts can strain an already overworked service operation! We all know there is a huge technician shortage. Companies that highly train their service operation employees find they are less stressed, more capable, and can make better informed decisions for your company and your customers.

Failures never seem to happen at the optimum time. Unplanned failures are always expensive.

Everybody likes a problem solver. Especially one that understands and can confidentially explain technical component failure information, while also making logical recommendations, and understanding the importance of durable repairs. Highly beneficial in advancing your employees and your company by learning valuable inspection skills and knowledge that can help prevent repeat failures and reduce downtime while also making better parts replacement/reuse decisions. Better parts replacement decisions can help relieve supply chain issues currently affecting all industries. Our courses add value to your operation by giving your service technicians and service-related employees the necessary knowledge and critical thinking skills they need to excel in their jobs and their careers.

-  **Failure Analysis Level 1 - May 13-16, 2024, Canonsburg, PA**
-  **Failure Analysis Level 1 - July 29-Aug. 01, 2024, CO Springs, CO**
-  **Failure Analysis Level 2 - Oct. 08-11, 2024, CO Springs, CO**

BENEFITS

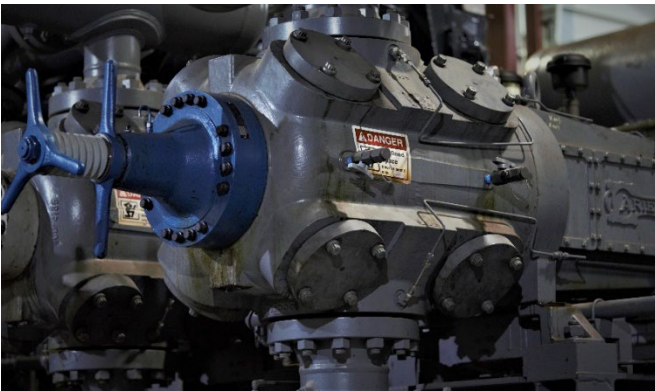

- ✦ Make your people better problem solvers
- ✦ Eliminate expensive repeat failures
- ✦ Accurately diagnose worn parts, replace only what's needed
- ✦ Reduce equipment downtime
- ✦ Sets a strong technical foundation for service management

WHO IT'S FOR

- ✦ Engine and Equipment Manufacturers, Equipment Dealerships, Natural Gas, Mining Process & Surface Mining, Marine, Remanufacturers, Heavy Duty Diesel Engines
- ✦ Anyone that works on Heavy Duty Engines
- ✦ Service Managers, Engineers, Reliability and NDT Techs, Vibration Techs, Port Engineers
- ✦ Manufacture Customer Service Reps, Field Technical Specialists
- ✦ Technical Support Staff
- ✦ Service Technicians, Warranty Admins

GAS COMPRESSION
